Very Bright & Energy Saving

The M Series utilizes Common Cathode Technology. This is a much more efficient way of delivering power to the individual colors: Red, Green, and Blue. Each color has different voltage requirements, and with Common Cathode, we can control the amount of voltage that is delivered. This provides up to 75% energy savings, and allows us to achieve a much brighter display.

Common Cathode Technology is not available on the 2.6mm (M2655I) panel

Standard Power Delivery

Common Cathode Technology

Easy Setup & Maintenance

The M Series features ergonomic handles and an automatic locking system allowing an individual to easily assemble the display. The LED modules are front or rear serviceable, and the power/data box can be removed with one click. It features a patented structural frame with corner protection.

Dynamic Production Capabilities

With virtual production on the rise, and green screens becoming a thing of the past, our M Series has the capability to offer dynamic LED solutions for XR, TV and film production. This technology allows for more flexibility in creating interactive, life-like video environments, eliminating the need for on-location shoots and reducing post-production time — therefore saving you time and money. Inquire about how our M Series 2.6mm can elevate your production to new levels.

Unique Screen Configurations

The M-Series allows you to create curved or even circular LED Displays. The Radian Connector can adjust between $\pm 6^{\circ}$, $\pm 3^{\circ}$, 0° , and even allow for 90° corners.

90° Corner

Specification	M1955I	M2655I	M2955I	
Pixel Pitch	1.9 mm	2.6 mm	2.9 mm	3.9 mm
Cabinet Dimension (W×H×D)	1.64x1.64 ft / 500x500 mm			
Cabinet Resolution (W×H)	256×256 px	192×192 px	168×168 px	128×128 px
Cabinet Weight	24.2 lbs			
Brightness	800 nits	1000 nits	1000 nits	1000 nits
Gray Scale	16 Bit			
Refresh Rate	3840Hz		1920Hz	
Horizontal Viewing Angle	160°			
Vertical Viewing Angle	120°			
Access	Front / Rear Access			
Ingress Protection	IP20			
LED Lifespan	50,000 h			
Working Temperature	-4°F~104°F			
Storage Temperature	-40°F~176°F			
Working Humidity (RH)	10% ~ 90% RH			
Working Voltage	110V~240V			
Max. Power Consumption	170 watts			
Avg. Power Consumption	70 watts			
		6.0
